

WEBINAR

# TRUE DETECTIVE: GEORGIA WC USING INVESTIGATION TOOLS TO AVOID COSTLY WC CLAIMS

THURSDAY • JUNE 27 • 2024  
1-2 P.M. EASTERN

When a workplace accident occurs, it is vital, especially at the outset, that important information and evidence is secured and reviewed. The more information available to claims professionals, the better, as it allows for sound decisions in claim handling, a greater chance of favorable outcomes and less costly claims. Depending on the posture of the claim, whether pre-litigation or after a hearing request, the investigative tools available in workers' compensation claims – from ISO reports to surveillance to depositions – can help secure information to manage, mitigate and often reasonably dispose of potentially costly claims. This webinar will equip viewers with information on the different investigative tools available and best practices when it comes to investigating a workers' compensation claim.

PRESENTED BY  
ATTORNEYS:

JOANNA  
JANG

SCOTTY  
HOFFMAN
